## MONTHLY WHOLESALE TRADE: SALES AND INVENTORIES <br> January 2015

Intention to Revise: Monthly Wholesale sales, inventories, and inventories/sales ratios will be revised based on the results of the 2013 Annual Wholesale Trade Survey and
the preliminary results of the 2012 Economic Census. Revised not adjusted and corresponding adjusted estimates are scheduled to be released on our website on March 31 , 2015 at 10:00 a.m. EDT.

Sales. The U.S. Census Bureau announced today that January 2015 sales of merchant wholesalers, except manufacturers' sales branches and offices, after adjustment for seasonal variations and trading-day differences but not for price changes, were $\$ 433.7$ billion, down 3.1 percent (+/-0.5\%) from the revised December level and were down 1.0 percent (+/-0.9\%) from the January 2014 level. The December preliminary estimate was revised downward $\$ 2.4$ billion or 0.5 percent. December sales of durable goods were down 1.4 percent (+/-0.9\%) from last month, but were up 5.8 percent (+/-1.2\%) from a year ago. Sales of electrical and electronic goods were down 4.4 percent from last month and sales of metals and minerals, except petroleum were down 4.1 percent. Sales of nondurable goods were down 4.6 percent ( $+/-0.9 \%$ ) from December and were down 6.7 percent ( $+/-1.2 \%$ ) from last January. Sales of petroleum and petroleum products were down 13.5 percent from last month and sales of drugs and druggists' sundries were down 3.6 percent.

Inventories. Total inventories of merchant wholesalers, except manufacturers' sales branches and offices, after adjustment for seasonal variations but not for price changes, were $\$ 548.7$ billion at the end of January, up 0.3 percent ( $+/-0.4 \%)^{*}$ from the revised December level and were up 6.2 percent ( $+/-0.7 \%$ ) from the January 2014 level. The December preliminary estimate was revised downward $\$ 0.7$ billion or 0.1 percent. January inventories of durable goods were up 0.6 percent ( $+/-0.4 \%$ ) from last month and were up 7.7 percent ( $+/-1.1 \%$ ) from a year ago. Inventories of electrical and electronic goods were up 2.4 percent from last month and inventories of motor vehicle and motor vehicle parts and supplies were up 1.6 percent. Inventories of nondurable goods were down 0.1 percent (+/-0.4\%)* from December, but were up 3.7 percent (+/-1.1\%) from last January. Inventories of farm product raw materials were down 4.6 percent from last month, while inventories of paper and paper products were up 3.0 percent.

Inventories/Sales Ratio. The January inventories/sales ratio for merchant wholesalers, except manufacturers' sales branches and offices, based on seasonally adjusted data, was 1.27. The January 2014 ratio was 1.18.

Data in this report are based on a sample and, therefore, are subject to sampling and nonsampling error. A discussion of the reliability of the estimates and general survey methodology can be found at: [http://www.census.gov/wholesale/www/how_surveys_are_collected/monthly_methodology.html](http://www.census.gov/wholesale/www/how_surveys_are_collected/monthly_methodology.html).

> Monthly Inventories/Sales Ratios of Merchant Wholesalers, Except Manufacturers'
> Sales Branches and Offices: 2006 to 2015
> (Estimates adjusted for seasonal and trading-day differences, but not for price changes)

Monthly Wholesale Trade for February is scheduled to be released April 9, 2015 at 10:00 a.m. EDT.
For customized wholesale time series estimates by industry, visit the Census Bureau's web site at [http://www.census.gov/timeseries](http://www.census.gov/timeseries).
To receive the latest updates on the nation's key economic indicators, download the America's Economy app for Apple and Android smartphones and tablets.
The U.S. Census Bureau updated its Application Programming Interface (API) with monthly and quarterly economic indicators. The API allows developers to combine Census Bureau statistics with other data sets to create tools for research on a variety of topics. For more information, visit [http://www.census.gov/developers](http://www.census.gov/developers).
For additional survey information, visit [http://www.census.gov/wholesale](http://www.census.gov/wholesale).

* The 90 percent confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.

Footnotes:
${ }^{\mathrm{p}}$ Preliminary estimate.
${ }^{\mathrm{r}}$ Revised estimate.
${ }^{1}$ For a full description of the NAICS codes used in this table, see the 2007 NAICS manual or http://www.census.gov/eos/www/naics.
${ }^{2}$ Except where indicated, sales and inventories estimates are adjusted for seasonal variation. Estimates of sales are also adjusted for trading-day differences and moving holidays. See Table 3 for the combined adjustment factors. Adjusted sales-to-date estimates are not tabulated.
${ }^{3}$ No discernible seasonal pattern for this NAICS code was detected in the latest annual review of the seasonal adjustment for inventories. Consequently, the "Adjusted" inventories estimates are equal to the "Not Adjusted" estimates.
Note:
Estimates have not been adjusted for price changes. Table 2 provides estimated measures of sampling variability. Additional information on confidentiality protection, sampling error, nonsampling error, sample design, and definitions may be found at
http://www.census.gov/wholesale/www/how_surveys_are_collected/monthly_methodology.html.

Note:
Estimated measures of sampling variability are based on estimates not adjusted for seasonal variation, trading-day differences, or moving holidays. Additional information on confidentiality protection, sampling error, nonsampling error, sample design, and definitions may be found at http://www.census.gov/wholesale/www/how_surveys_are_collected/monthly_methodology.html.

## Reliability of the Estimates

Because the estimates presented in this report are based on a sample survey, they contain sampling error and nonsampling error. Sampling error is the difference between the estimate and the result that would be obtained from a complete enumeration of the sampling frame conducted under the same survey conditions. This error occurs because only a subset of the entire sampling frame is measured in a sample survey. Standard errors and coefficients of variation (CV), as given in Table 2 of this report, are estimated measures of sampling variation.

The margin of sampling error, as used on page 1 , gives a range about the estimate, which can be used to construct a 90 -percent confidence interval. If, for example, the percent change estimate is +1.2 percent and its estimated standard error is 0.8 percent, then the margin of sampling error is $\pm 1.753 \times 0.8$ percent or $\pm 1.4$ percent, and the 90 percent confidence interval is $1.2+/-1.4$ or -0.2 percent to 2.6 percent. If the interval contains 0 , then one does not have sufficient statistical evidence to conclude at the 90 percent confidence level that the actual change is different from zero. Estimated changes shown in the text are statistically significant unless otherwise noted. For a monthly total, the estimated coefficient of variation is given. The resulting confidence interval is the estimated monthly total $\pm 1.753 \times \mathrm{CV} \times$ (the estimated monthly total). The Census Bureau recommends that individuals using estimates in this report incorporate this information into their analyses, as sampling error could affect the conclusions drawn from the estimates.

Nonsampling error encompasses all other factors that contribute to the total error of a sample survey estimate. This type of error can occur because of nonresponse, insufficient coverage of the universe of wholesale businesses, mistakes in the recording and coding of data, model error, and other errors of collection, response, coverage, or processing. Although nonsampling error is not measured directly, the Census Bureau employs quality control procedures throughout the process to minimize this type of error.

Table 3. Combined ${ }^{1}$ Adjustment Factors for Monthly Wholesale Sales and Inventory Estimates
Combined adjustment factors are computed using the Census Bureau's X-13 ARIMA-SEATS program and are based on data from the Monthly Wholesale Trade Survey.]

Footnotes:
${ }^{\text {「 Revised factors. }}$
${ }^{1}$ Combined factors for sales include the effects of seasonal variation, trading day differences, and moving holidays. Combined factors for inventories include only the effects of seasonal variation.
${ }^{2}$ Adjusted sales and inventories estimates for detailed kind-of-business levels in Table 1 are computed by dividing each "Not Adjusted" estimate by the combined adjustment factor for the corresponding kind of business and month. Adjusted estimates for broad kind-of-business levels are obtained by summing adjusted estimates at the appropriate detailed levels. Combined factors shown for broad kind-of-business levels may be used to approximate adjusted estimates at these levels, but the resulting estimates may differ slightly from the published estimates.

[^0]
## Description of the Survey

The Census Bureau conducts the Monthly Wholesale Trade Survey (MWTS) to provide national estimates of monthly sales, end-of-month inventories, and inventories-to-sales ratios by kind of business for wholesale firms located in the United States. Specifically, the MWTS covers wholesale merchants who sell goods on their own account and include such businesses as wholesale merchants or jobbers, industrial distributors, exporters, and importers. Sales offices and branches maintained by manufacturing, refining, or mining firms for the purpose of marketing their products are not covered in this report. Also excluded is NAICS Industry Group 4251: Wholesale Electronic Markets and Agents and Brokers.

The MWTS sample was selected using a stratified, one-stage design with strata defined by kind of business (e.g., Automotive, Furniture, Lumber, etc.) and annual sales size. The sample includes firms of all sizes and is updated on a quarterly basis to account for new wholesale firms, deaths, and other changes to the wholesale universe. Each month, questionnaires are mailed to employer firms selected in a probability sample of approximately 4,200 . Approximately $67 \%$ of those mailed provided data for this reporting period. Data for nonresponding firms are imputed based on data for similar-sized firms classified in the same kind of business. Approximately $33 \%$ of the total sales estimate and $33 \%$ of the total end-of-month inventories estimate is based on imputed data.

[^0]:    ${ }^{3}$ No discernible seasonal pattern for this NAICS code was detected in the latest annual review of the seasonal adjustment for inventories. Therefore, the combined adjustment factors for inventories are set to one for this NAICS code.
    Note:
    The seasonal adjustment factors shown are estimates derived from a model that uses sample survey data as input. Therefore, these estimates may contain sampling error and nonsampling error. Additional information on the general form of the model and the X-13 ARIMA-SEATS program may be found at http://www.census.gov/srd/www/x13as/.
